

SNAME Proudly Announces the Spring 2016 Fellows

SNAME members have said the prestige of being a Fellow is one of the most valuable features of membership.

A SNAME Fellow is recognized by their peers for making outstanding personal contributions to naval architecture, marine or ocean engineering, or allied disciplines through significant achievements in design, research, production, operation, education or associated management.

Only 3.8% of all SNAME members are Fellows.

The newly elected Fellows, who attended the Offshore Technology Conference (OTC) in Houston, were recognized at the SNAME OTC Reception. The remainder of the spring Fellows will be recognized at our SNAME Maritime Convention in Bellevue, Washington in November 2016.
