## **SNAME President R. Keith Michel Announces Exciting Changes with SNAME Journals**

***Marine Technology and SNAME News becoming the New (mt)***

***Changes to the Journal of Ship Production, and  
Journal of Ship Research also Announced.***

---

---

SNAME President announced several innovations to Society Members today. His statement from the SNAME E-Newsletter is below:

"There is an exciting change happening in the SNAME journals.

Beginning in March 2010, *Marine Technology* will have a new look. In each issue, a series of solicited technical articles will be presented around a specific theme. More details of the new *(mt)* are contained in the October issue of *Marine Technology* 'Message from the President'.

The *Journal of Ship Production* will take on an expanded role. Renamed the *Journal of Ship Production and Design*, *JSPD* will publish cutting edge papers on ship production as well as those papers on advances in ship design and related technologies previously published in *Marine Technology*. The *Journal of Ship Research* will continue to publish esteemed papers on applied research in disciplines such as hydrodynamics, propulsion, ship motions, structures, and vibrations. These changes are in response to requests from our membership, who seek a more readable and current SNAME magazine while continuing to value the peer-reviewed technical papers traditionally published by SNAME. This plan is the product of collaborative efforts of the SNAME journal chairs and members of the various committees. Their work is very much appreciated.

I am confident these re-engineered journals will be a major step forward in our Society's mission of disseminating timely technical information on topics of relevance and interest to our members."

**R. Keith Michel  
SNAME President**

The Society of Naval Architects and Marine Engineers is an internationally recognized non-profit, technical, professional society of individual members serving the maritime and offshore industries and their suppliers. Founded in 1893, the Society comprises over 10,000 individuals throughout the United States, Canada and abroad. Membership is open to all qualified applicants in or associated with the maritime, offshore, and small craft industries.
